I'd just like everyone to know that [@NewburyAS](#) is organizing a Meteorwatch event on Twitter for the peak of the Perseids meteor shower and everyone's invited!

We are using the hashtag [#Meteorwatch](#) to keep track of tweets, so tweet up and join in the fun!

The event will run from 21:30 BST (UTC +1) on Tuesday August 11th 2009 through to hopefully the early hours (UK time) of Thursday August 13th. We would love to see tweets from people across the globe reporting their experiences of the meteor event. Any pictures, video or other media you can share is also most welcome!

For more information see: <http://is.gd/25rSS>

Hope to see your tweets up there!
